Cons: Whether you like it will depend on your musical taste.</p> <p>Ok, my review should weigh pretty heavily considering what this subwoofer has to overcome to be heard. I had it installed at Circuit City after hearing it in comparison to three models of Bazooka powered subwoofers in the store and in two installations....</p> <p>Read the full review</p>

I purchased the unit for \$185 from an eBay seller (why do retail outlets charge over \$100 more?), and purchased a 10-gauge amp wiring kit from Crutchfield for about \$25. Clean & Clear Bass Cons: None</p> <p>I first started looking for a subwoofer a little after I got my car and I just wanted more bass. I was looking at powered subwoofers, because I drive a small car (1999 Kia Sephia) and I wanted to still have room in my trunk for my snowboard, and my golf...</p> <p>Read the full review</p>

Im shocked at the deep bass from the 10" woofer. It is compact/hidden away, but that makes using controls on the box difficult. I lost very little space in my Silverado extended cab...</p> <p>Read the full review</p>

Cons: none</p> <p>I wanted a little more bass in the factory system of my S-10 extended cab pick-up. I'm in my late 50's and didn't need to be heard by the neighbors, just needed a little more low end bass. I didn't want to give up all the space behind the seats so the ...</p> <p>Read the full review</p>

Cons: Cheesy mounting.</p> <p>I had a Basslink installed in my 94 Ford Crown Victoria, and I feel it is the perfect solution to getting great sound without breaking the bank or losing your trunk. <p>Product Rating: ★★★★★</p> <p>Sound Quality: ██████████</p> <p>Ease of Use: ██████████</p> <p>Durability: ██████████</p>	<p>Very Nice by kisskane, Sep 09 '03</p> <p>Pros: Awesome sound, does not overheat, takes up no room, easy to install, great price.</p> <p>Cons: Just not that big bang bass you hear from blocks away.</p> <p>I have a Mitsubishi Montero 2002. It has a factory Infinity system in it. So that is what drew me to this sub along with the great reviews. I have to say I agree with all the other reviews. It is awesome sounding. But, if you are looking for that Hip Hop license plate vibrating bass, this is not it. It really gives my system just what it needed. Do not get me wrong, it gives out plenty of bass even in my big SUV. I would recommend this bass for anyone. Not sure how it would sound in the trunk, meaning a seperate compartment then where the driver and passengers would be. But sounds awesome in mine. I mostly listen to KISS, Skid Row, Disturbed, Kid Rock. Some rap. AWESOME</p>

This is such an easy to install setup that will fit in any car. Everything you need is in the box, except for power connections.</p>

If your looking for excellent, clean sounding bass in a tight space this will amaze you! I only paid \$230 including all wires & cables from a discount on-line store, even at \$350 retail it's worth every penny! I like the fact it's an all in one unit, easy to hook-up & install, you get the bass sound of a box two or three times it's size, and has a very durable thick metal grills to protect speakers!</p>
